Ampoule compteur twingo 1

Changer ampoule compteur twingo 1. Ampoule compteur twingo 1 phase 2. Ampoule led compteur twingo 1.

Walken38 Good morning and welcome If you talk about the 2 large screws under and it's to the right of the viewfinder, it's simple: a large flat screwdriver in the slot, and a 1/4 turn to loosen The center part will then come out on its own, and you can remove everything with your nails or by making the lever gently To put them back, clipper, tighten in the center with the screwdriver, and screw a 1/4 turn @Walken38: I merged your message with the theme that contained the tutorial of JM22, it will be more convenient for the next one to fall on your question and wonder what tutorial you talk about Larry, Moderator PlantAte Renault The fat is the Super life, Thank you very much rpm91 for this fast hyper pousse I confess that, having never seen this kind of "vis", I dared not too much touch it, afraid to break everything, Thanks again! @Larry: good image and to merge, I think it can help other people Walken38 Hello it's all and all, From one day to the next my display module is swollen, If I changed the display module, would I still have the mile counter of the car? You then need to screw the viewfinder with precautions without touching and crush the liquid crystals and replace the ampoules with the stopper. Thus, it is the screen itself that has a problem. Do I need to change the meter? Less than one euro, it is better to change them when the top of the dashboard is mountain d'Å. Chichil'er... What a rÅÅ activityÅ©;-) I'll try as long as I have some free time (weekend probably). Here is a picture of what I found on: Can anyone help me? Some also say that the touch of open door lights on will not work anymore? To remove the top just make three star screws two are plates And the third in the center behind the screen. Note: I had previously removed the 4 lamps one by one, but the noise was still there. And since there is a noise (more or less crackling) and even when I turn off the car the noise persists. Thanks in advance for your information on this subject! edited for the last time by Larry.Kubiak in Fri 04 Apr 2014 22:04; Edited 3 times I could only respond to it for the disassembly of the instrument panel. Is there a special reference to use? & Nbsp; Thank you again and even soon! Good evening, JM22 made a great tutorial for this repair that you will find here thanks to him. I apologize in advance for this stupid question. Thanks in advance your help turn the central part with a flat screwdriver, holding the outside with your fingers. New: Join the association and benefit (among other things) of the Å ceMalaÅ € Ready to use Can Clip + Instructions Renault More information Here Polo 6R 1.6tdi 90ch Comfort Å € "09/10 Å €" 87mkm (03/15-> ..)
