Load the dataset and move the pointer towards the Fields panel on the right side. A Now, drag-n-drop any field like cAAASalesAmounteAAA to the reports panel. You can also click on the check box of the SalesAmount field. A New visualization in the form of a column chart will appear showing the total sum of all the values of the SalesAmount column. A Instead of showing every value in the column of more than two million rows, Power BI automatically creates an aggregate for these columns. Every field with a Sigma icon has numerical values. Depending on the measure you can create or change the chart aggregation. IB. IB rowoP erbos nÂcamrofnî sjÂm renetbo arap lairasep mE acinegleitnêl ed dadinumoC artseun etisIV.
